Profile

Fresh Graduate Frontend Developer with solid hands-on experience in Angular and React. Passionate about building scalable, responsive web applications, integrating REST APIs, and delivering clean, maintainable frontend solutions.

Projects

MedFinder (DEPI Graduation Project)

Angular • .NET • MySQL

- Developed the frontend for an online medicine reservation platform.
- Built authentication, medicine search, reservations, and dashboards.
- Integrated Laravel/.NET REST APIs.

Learning Difficulties Diagnosis Platform (Graduation Project)

Angular • Laravel

- Developed an interactive assessment platform for diagnosing learning difficulties in children.
- Built dynamic questionnaires and assessment workflows.
- Integrated backend APIs for submitting assessments and displaying results.
- Created responsive interfaces for parents and administrators.

QuickPick (Online Shopping Website)

React • Redux • Fake Store API

- Developed an e-commerce web application using React and Redux.
- Implemented product browsing, filtering, shopping cart, and responsive layouts.
- Integrated external REST APIs for product management.

WorkSync (Task Management System)

React • Redux Toolkit • Rest API • Bootstrap

- Developed a task management web application using React and Redux Toolkit.
- Implemented task creation, editing, deletion, filtering, and status management.
- Integrated REST APIs for task synchronization and data management.
- Built reusable React components and responsive user interfaces.
- Applied state management using Redux Toolkit for efficient data handling.
